

# Pharmaceutical Containments

With over 40 years of experience in industrial safety and protection, LanCS Industries is an industry leader in manufacturing custom industrial containment solutions. Our products protect the health, safety, and integrity of our customer's products, consumers, and workers in the pharmaceutical, biological, laboratory, and nuclear industries.

LanCS supports companies in the pharmaceutical and biological industries with flexible isolators, containment tents, charge bags, transfer bags, sleeves, and related API containment products. Our flexible containments have many uses and benefits in pharmaceutical and biological manufacturing and operations that include:

- Bulk drug manufacturing
- Clinical trials delivery preparations dispensing
- Drug research
- Drug preparation
- Equipment cleaning and maintenance
- Equipment enclosures
- Laboratory scale materials storage and handling
- Laboratory waste handling
- Pilot plant scale-up
- Product packaging
- Quality control laboratory sample splitting
- Tablet machinery enclosures

LanCS' experience and capabilities in designing and manufacturing industrial containments enable us to support pharmaceutical and biological companies across industry categories and specialities.

# Pharmaceutical Containments

Wherever airborne particles and contamination are a threat or obstacle, our products minimize worker exposure to harmful airborne APIs, mitigate the risk of product cross contamination, and reduce product waste at every stage of the pharma/bio manufacturing process, including:

- Active Addition
- Blending
- Dispensing
- Granulation/Drying
- Loading
- Milling
- Processing
- Tablet Compression

At Lancs we work side-by-side with you to develop customized solutions for your most basic to your most challenging projects. Our custom design and manufacturing expertise delivers your products to you in the precise material, size, shape and functionality your unique situation and challenge requires. Each of our containments is thoroughly inspected and air tested to ensure you receive the safest, most reliable containment product every time.

For more information and to discuss your unique situation, project, or process containment requirement, please contact your Lancs Industries representative.
